

RICHMOND TERMINAL

VOL. VIII.

RICHMOND, CALIFORNIA, SATURDAY, JULY 16, 1910.

NO. 25.

Growth of the Soda Water Habit

THE girl behind the soda fountain has come into her own. If it's a representative of the other sex who jostles with the fizzy water, he's a sovereign and a white jacket and apron are his robes of state. For soda water has reached one of the very highest notches—almondine, wheat and automobiles and hash and beer in the scale of life's necessities. This is true all over the broad land from New York as far west as Reno, Nev., or even further west to Os-knewe, Cal. Ice cream soda has been placed upon a marble pedestal and we are all bowed down in worship—old men, coeds, stereotypers, sunnery girls, middle-aged ladies and David Belasco. Every day, summer and winter, we shove our nickel over the slab and murmur humbly that a desire would be fulfilled unless we had a "citrusy phosphate" or a "pistachio royal sun-dae," with green trimmings.

And all this means to us in cost, comparative figures that stick in your brain and make you think of economy and the taxes. I price of living, the poor children starving in the slums and other disturbing things when you're going to turn into the corner drug or fruit store one of them banana frappes, the very latest thing, for 15 cents.

But here's what the figures show: That ten billions of nickels are spent every year at soda fountains in this country, and as there are only a billion nickels in circulation, it is plain to be seen that each one of them would have to make ten trips to the soda fountain if only nickels were used. That the nation's expenditure for soda water and carbonated drinks this year is estimated at \$500,000,000. It makes it all the more appalling when you think that that is half a billion dol-

lars, which would buy fifty-five Dreadnoughts, and is three times the value of the yearly output of automobiles and would pay the debts of all the American churches four times over and would defray the university expenses of half a million students, and is more than double the combined yearly cost of the army and navy! Wow! The amount of soda water consumed yearly is estimated at 479,062,500 gallons, which is dispensed from 120,000 fountains. The average price of a fountain is \$2,000, so you get a total investment of \$240,000,000.

And in these days the soda fountain is busy summer and winter. From year's end to year's end the hiss and jingle of the soda fountain in Uncle Sam's domain never ceases. The time was when for half the year the fountain was about as idle as the straw hat and the parasol. Public fancy has changed all that, and now the dispenser of fizzing sweets works nearly as hard in January as in the dog days. Not that he hands out hot drinks only in blizzard temperature; far from it. Soda fountain drinks tickle the palates of the countless numbers the year round, and thus it happens that the disher—the handy little tool that soda fountain attendants have for scooping up the cream—never gets a vacation.

Besides the direct profits, the soda fountains bring into the drug stores people who buy medicines, soap, perfume, toilet articles, etc. The cost of the fountain itself is far from representing the entire outlay. While in a small establishment the druggist finds it economical to buy his soda and cream, in a large one he makes it himself, and therefore buys carbonators, freezers, syrup percolators and other apparatus. Minor accessories, too, must be provided.

ALLOWANCE FOR THE LIVING

told of his poor prospects in Walton and asked her if she thought she could share them with him.
"I would not go," was the startled reply.
Luke drew back, hurt, stunned, unbelieving.
Edith Lowrie remained fixed in her resolve. Her eyes were wide open and her figure was erect. She watched her lover as he flung himself into a chair and shaded his eyes with his hands. She glided to his side, sat on the arm of his chair and even smoothed his hair with her jeweled fingers. If he felt her caresses he did not respond or even move.
"My dear, dear friend," she began.
"What would you do with me? It is your ideal that you love, not me. You would soon find that you and then—" Her hands fell among the folds of her dress. She crumpled the silk between her fingers as she spoke.
"Those silks, this lace, these jewels, the pictures, books, the soft carpet beneath my feet, all are simple necessities to me. They are not objects of my love, but part of my daily life. Without them I would not be what I am, nor what you think I am. Think of me at Walton in an old calico dress, bumbling over my work. Your sister would be a very queen beside me, and she as well as you, would despise me for my ignorance."

With strong effort he drew himself from the girl's embrace and went from the room as one in a dream. He said no word of farewell and she made no effort to detain him. As he passed from the house Edith went to the window and watched his retreating figure. "Is there no such thing as friendship?" she asked herself aloud.

A dark, dreary day in November seven years later the vines on the young physician's home in Walton were dead and covered with snow. The ground was white and flakes filtered through the trees. Luke Clark was dying. From hard work the people of the little village said,

"Say I will be down in a moment, the girl told the maid.

When the door closed she jumped to her feet, went to the mirror and stood admiring herself before going down.

In the drawing room stood a young man with a fine head and clear cut features. Hearing the rustle of silks on the stairs, he turned and caught her hands held out to greet him.

After a short conversation in which he told her how much pleasure her letters had given him since taking up his residence out of the world, he burst forth in expressions of love. He

WHERE IT ENDED

And, Luke, where do you expect all this to end?

"End? I hope it never will end. I don't see why it should."

Folding up a little pink note Luke Clark put on his hat and went to visit some of his patients.

"How little men know the hearts of women!" his sister ejaculated as Luke left the room.

In a luxurious house in one of the fashionable residence districts of Philadelphia a dainty creature was reclining with a novel in her hands when a servant brought in a card. This was six months after Luke had taken up his residence in Walton.

"Say I will be down in a moment," the girl told the maid.

When the door closed she jumped to her feet, went to the mirror and stood admiring herself before going down.

In the drawing room stood a young man with a fine head and clear cut features. Hearing the rustle of silks on the stairs, he turned and caught her hands held out to greet him.

With the sister's consent the little black figure hurried to the sick chamber. She threw herself on her knees beside the bed, her hands, bereft of rings, clasped the hand of the dying man. Involuntarily he opened his eyes for his light plant.

A pale little woman, almost a child in appearance, dressed in deep mourning, made her way through the house, much to the alarm of the one servant. She insisted on seeing the patient and would not be satisfied until Dr. Clark's sister came to see the strange visitor.

With the sister's consent the little black figure hurried to the sick chamber. She threw herself on her knees beside the bed, her hands, bereft of rings, clasped the hand of the dying man. Involuntarily he opened his eyes for his light plant.

A lot of valuable time is wasted on explanations and apologies.

SHAD IN HATCHING.

Work of Experts Aboard the Coast Vessel, the Fish Hawk.
Lying at anchor in the Delaware River off Gloucester in a little vessel painted an immaculate white, which bears across her bow the name, Fish Hawk, the Philadelphia Ledger says. She belongs to the United States fish commission. Her crew is clearing her decks for action, laying out long spawning tables and toiling away in preparation for the millions of shad eggs which will soon come to the vessel from the fishermen up and down the river West.

While the Fish Hawk has been employed in shad hatching on the Delaware many seasons since 1881, this is her first visit here in four years. She covers the entire eastern coast from the Kennebec to Key West.

The work of egg collecting is done by the crew of forty-three men, all of whom are experts. They go out to the fishing grounds in small boats towed by steam launches and there secure from the market fishermen the shad which are about to spawn. These eggs are fertilized in large pans and after several days are placed in jars in which they hatch in from four to seven days, the length of time depending on the temperature of the water. When the shad have attained the size of half an inch they are taken to the river beds and turned loose.

The Fish Hawk has collected as many as 125,000,000 eggs in a season, 80 to 95 per cent of which have proved fertile. In nature, it is said, not 5 per cent of the eggs hatch. The Fish Hawk has 350 hatching jars, each capable of holding \$5,000 to \$10,000 eggs. When the fish are hatched they find their way through a drain pipe into an aquarium, where they remain until turned out.

The Fish Hawk has collected as many as 125,000,000 eggs in a season, 80 to 95 per cent of which have proved fertile. In nature, it is said, not 5 per cent of the eggs hatch. The Fish Hawk has 350 hatching jars, each capable of holding \$5,000 to \$10,000 eggs. When the fish are hatched they find their way through a drain pipe into an aquarium, where they remain until turned out.

A newspaper has 5,000 readers for each 1,000 subscribers, says the Albion, Mich., Recorder. A merchant who puts out 1,000 hand-bills gets possibly 300 or 400 people to read—that is, if the boy who is trusted to distribute them does not chuck them under the sidewalk. The hand-bills cost as much as a half column advertisement in the *local paper*. All the women and girls, both the men and boys, read the advertisements. Result: The merchant who uses the newspaper has 3,500 more readers to each 1,000 of the paper's readers. There is no estimating the amount of business that advertising does bring to a merchant, but each dollar brings somewhere from \$20 to \$100 worth of business.

When a man is caught in one exaggeration he will have a pretty hard time trying to convince the world that all he says it not colored by exaggeration. The first exaggeration may have been innocent enough. It may do no harm. But, leaving out all moral considerations, exaggeration and untruthfulness in advertising are mighty bad business. They serve well enough until the truth is found out; then, as the old adage has it: "Truth is mighty and will prevail." The exaggerator must be on the strain continually to exceed his last exaggeration. He will have to appeal each time to a new set of customers. This is impossible to do continuously among any one class of people. The old proverb may be true that "there is a sucker born every minute." But it is very dangerous to attempt to found a stable business upon such a foundation of sand.

We wonder if our home merchants ever stop to think why the big mail order houses are so successful. Their success lies in their continual advertising of their goods, says the Hunkville (Mo.) Herald. They never stop advertising because of changes of season or for any other reason. The country newspapers have been fighting these mail order houses hard for years for the benefit of the home merchant, and some of the merchants appreciate this and some of them do not. If the mail order houses would practice advertising by "spurts," in certain seasons of the year, like some country merchants, they would soon go out of business. While the local or home merchant keeps his business "under a bushel," so to speak, or out of their local paper on account of hot, dry or wet weather, or bad roads, they are giving "the" mail order houses the advantage of them before the people, for those houses never stop advertising for any kind of weather or for dull times.

He Ate His Own Words.

Not long ago the punishment for libel in Russia was the requirement that the libeler literally eat his own words. A man who published a small volume reflecting on the unlimited power of the sovereign was seized, tried in a summary way and condemned to consume the objectionable words. In one of the public streets the book was severed from its binding, the margins cut off, the leaves rolled up one by one and fed to the unfortunate author. A surgeon was in attendance to pronounce upon the number possible to give without endangering his life, but he is reported to have set the limit at something like 200.

Parades are attractive, if good, but people laugh at them if they are not. Be careful in getting up a parade of any kind.

Entered as SECOND-CLASS MATTER JUNE
21, 1901 AT RICHMOND, CALIFORNIA under
the ACT OF CONGRESS of March 3, 1899.

SATURDAY, July 16, 1910.

While recall No. 2 is working it is said recall No. 1 will be resurrected from its Rip Van Winkle sleep.

The recall petition verified at the office of the county clerk at Martinez was presented to the Honorable council Monday night in the report of the city clerk.

The duty has been taken off of attorneys in Richmond and after some debate it may be taken off of lemons as it said a good sized lemon awaits the pleasure of the recall promoters.

POLITICAL.

Today is the day of primary elections. vote.

Bacon will take a drop in Contra Costa County's political campaign. There is no demand for uncured meat.

W. S. Farley, the newly appointed city engineer has resigned to take effect August 1st.

E. E. Grow and George Raab, of this city are applicants for city engineer of Richmond.

Attorney C. A. Odell, the next runner for Justice wore the winged shoes to Martinez on a flying trip on court matters.

While City Attorney Windrem is visiting out of town, legal talent on both sides of the recall controversy has been secured.

A bystander remarked yesterday: "Danged if Ed. Conlon isn't going to run for supervisor against C. J. Rihm. It's no use, Rihm will win."

Henry Curry was down from Martinez again working among his friends on his candidacy for sheriff. If the gentleman comes a few more times he will secure Richmond's four Democratic votes.

John S. Chandler is chairman and Walter Roth the secretary of the new Democratic organization launched on the west side. H. E. Petillion and Councilman Dooling made rousing speeches. Bert Curry and John Kenny formulated plans of procedure.

Hon. George Meeso, county assessor, being a candidate for the office which he now fills, resigned as chairman of the Republican County Central committee, but since he has handled affairs so well his resignation was tossed in the waste basket, and he was retained.

Hon. Charles F. Curry Makes a Statement

San Francisco.—The attention of Republican voters throughout California has been attracted to a remarkable interview with Charles F. Curry which has been published in the San Francisco Call. The position which Curry takes in this interview has appealed to every fair minded citizen in the state who has read it. The Secretary of State assumes a position of dignity in reference to his own candidacy and for the first time in this campaign he gives the public an insight into the strange methods which his opponents have adopted in their effort to advance their own cause. The interview comment is as follows:

"I confidently expect to be maintained by the Republican voters. All the opposing forces have made and are making desperate efforts to pull down my friends and supporters. They have spent money like water and are preparing now to outdo all their former efforts in frenzied finance campaigning. In that very cir-

cumstance lies the proof of my strength. If my opponents did not believe that I was far in the lead they would be paying their delicate compliments to me. As this date they have experienced no difficulty in securing barrels of money, and their generally known plans indicate that there are more barrels to be tapped. No effort has been spared to misrepresent me to the people of the state.

In that particular my opponents haven't been so successful as in their money getting. I have not the slightest fear of the verdict that will be registered by the Republicans of California at the primary polls. I have no barrel. I have what is better than money. I have friends who are making my fight not for pay but for me and for what they know I will always stand.

The Republican nomination for governor cannot be purchased for money while we have a direct primary law. Neither can it be won by malicious assaults upon decent men's characters. I have the support of genuine, red-blood men of California who know no master politically or otherwise. I have the support of thousands of earnest Republicans who know my record, and who stand for clean, efficient government, not hypocrisy.

The situation looks better for me every day. A lot of noise has been made and the most desperate methods made to pull down my friends. My forces are growing. I will be nominated by a landslide vote, but as a Republican I have submitted my candidacy to the Republicans of California in strict compliance with the letter and spirit of the direct primary law. I did so willingly. I worked for a direct primary law to the end that I might go to the people for any political preference I might seek.

The submission of my candidacy was in good faith. By going to the people I assumed a partisan obligation. I shall be true to that obligation. I owe it to the people and my party to support the man of their choice if they should choose another to lead them. Nearly two months ago in a statement of my personal platform I make the pledge to the people in response to inquiry from the Republican State Central Committee I have reiterated what I said to the people in May."

MAY SELL WHOLE CITY.

R. J. Lipe may soon have a recall working against him. If he continues to do business of selling real estate. Besides the sale of the Robert Bauer property for the First National Bank for \$9350, the John Matson property for \$5500, in all five lots. Mr. Lipe has just closed the sale for Mrs. Mary E. Lucas of two lots at the corner of Macdonald avenue and 8th street for \$5150 to W. A. Morehead of Lodi, who will very soon build thereon one of the best buildings in Richmond, a two-story fire-proof Class A. This looks good for Mr. Lipe who has sold about \$50,000 on growing Macdonald avenue section since January, 1910.

RICHMOND Y'S.

Last Saturday afternoon at the home of Mrs. Royals on 21st street, Miss Stewart of Pasadena organized a young people's branch of the W. C. T. U. which will be known as the Richmond Y's.

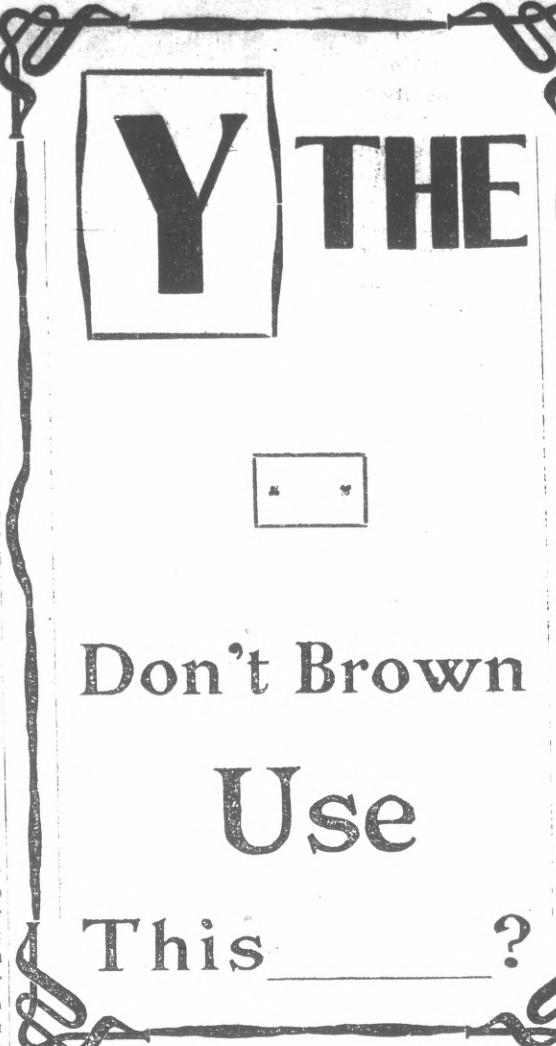

This is the first organization of this nature for young people in the county and while only a few of the officers have been elected it is to be hoped that the Y's will be in full working order very shortly. The following offices have been filled: President, Miss Oral Scholes; secretary, Miss Alice Scholes; treasurer, Miss E. M. Ray.

Tomorrow evening the Y's will give an Anna Gordon birthday meeting at Mrs. App's, at 1116 Tenth street. The trouble will begin to every fair minded citizen. The regular meetings will be on the second and fourth Tuesdays of each month.

BIRTHDAY GREETINGS.

Miss Edith Selby at the home of her parents on Biwell avenue Monday afternoon celebrated her birthday. Mrs. Lee Selby directed the affairs for the young hostess. Delightful refreshments were served and very pretty games were enacted.

Thereafter about one hundred and fifty guests among the youth who may have celebrations at their own homes.

DRUDS AGAIN.

The Druids will give another big

dance on August 20th, 1910. This will take place at Druds Hall, Standard Avenue, Point Richmond. The

Druids dances are always well attended because a good time is always sure. The music will be furnished by the Tapioca Orchestra.

The admission will be 25 cents for gentlemen and ladies free. The members who are arranging the dance are Mrs. M. Guidi, Mrs. M. Turato and Mrs. M. Matteri. These ladies will guarantee every purchaser of a ticket an A-1 good time.

News Nuggets.

Mr. and Mrs. S. N. Smith are enjoying a summer outing at Los Gatos.

Prof. Walter Helms is on his way to recovery from his operation for appendicitis at the Abbott Hospital.

The public schools of Richmond will resume for the fall semester on August 8th.

Sixth street is a very inviting street for building. The Sixth street depot will soon be improved.

Miss Emma Meyers of Sacramento took in the sights of Richmond this week.

Waverly Tilden, George Weyman, Ward McRacken and Wayne Mc-

Racken are in Sonoma county rustinating.

Fred C. Schram & Co. are about to close a big deal in real estate.

Mrs. John Banks spent yesterday in the city of Richmond calling upon some of her friends, Mrs. Alpha De Sells and Miss Loraine Brown.

The admission will be 25 cents for gentlemen and ladies free. The members who are arranging the dance are Mrs. M. Guidi, Mrs. M. Turato and Mrs. M. Matteri. These ladies will guarantee every purchaser of a ticket an A-1 good time.

Attorney Henry M. Owens of San Francisco visited Councilman J. C. Owens and took in the sights of the Richmond city council while in session.

Herbert F. Brown, who purchased the 10th street corner, two lots and a small cottage, for \$6000, will build thereon a fire-proof building for a Savings Bank. The plans are out.

Louis Farrell, assistant superintendent of the Peoples Water Co., sustained a lacerated wound of his thumb while operating a drill. Dr. Cunningham dressed the digit and Mr. Farrell feels like Louis I.

Ben Spagnoli has sold his property at the corner of Macdonald avenue and 23rd street, near the high school for \$8000, an the corner opposite is about to be sold for a high figure, also Herbert F. Brown will take the

Destroys Hair Germs

Recent discoveries have shown that falling hair is caused by germs at the roots of the hair. Therefore, to stop falling hair, you must first completely destroy these germs. Ayer's Hair Vigor, new improved formula, will certainly do this. Then leave the rest to nature.

Does not change the color of the hair.

Recent discoveries have also proved that dandruff is caused by germs on the scalp. Therefore, to cure dandruff, the best thing to do is to completely destroy these dandruff germs. Here, the same Ayer's Hair Vigor will give the same splendid results.

Made by the J. C. Ayer Co., New York.

ENJOY PURITY SODA CRACKERS

For the Superior Quality
A Cracker that's Light,
Just taste a trial of PURITY
Tasty Flaky Right.

MUTUAL BISCUIT CO.

The New Flavor Mapleine

(Flavor of Maple)

A flavoring used the same as lemon or vanilla. By dissolving a spoonful of sugar in water and adding Mapleine a delicious flavor is made and a syrup better than maple. Mapleine is sold by the bottle and recipe book.

CRESCENT
MFG. CO.
Seattle, Wash.

DAISY FLY KILLER

Howard E. Burton, Assayer and Chemist,
Leading Gold Standard Specimen price—Gold,
Silver, Lead, \$1.00; Gold, Silver, Lead, \$1.00;
or Copper, \$1.00. Mailing Envelopes and full price
list sent on application. Control and Unpare work
selected. Reference: Carbonate National Bank.

MACHINERY For All Purposes HENSHAW, BULKLEY & CO. San Francisco and Los Angeles

GALL CURE HORSE COLLARS

Are made over Curled Hair Pads and will
not gall the horse.

Write for free sample of the Pad.
Give the name of your harness dealer.
Send to best dealers everywhere.

A. A. Van Vorhees & Co.
Sacramento, Cal.

NOTICE

ASKFORMORE ELECTRIC FELT

Mattress—7-inch border, 47 lbs. in weight,
made in layers. Price \$9.50, regular \$15.00.
Mail orders promptly attended to.

REANULT MERCANTILE CO.
770 Mission St., City

WHY PAY SO MUCH?

If you can get a twenty-five dollar suit of clothes for fifteen dollars DON'T YOU WANT TO DIT? We can get you a suit of clothes for such a price. Write us and we will tell you to order.

You pay five dollars down with the order and send the balance O. D. after examination. Write today for samples and measure blanks.

OUR ALL-WOOLEN GOODS
THE BEST IN THE WORLD

Los Angeles Woolen Mills
Tailoring Co.

620 Merchants Trust Bldg., Los Angeles, Cal.

NO NO FRECKLE CREAM

Will positively remove Freckles, Sunburn
and Tan. A skin beautifier, delightfully
perfumed. 10 cents a tube. Send for
Beauty Booklet. ADELE MILLER CO.,
1014 Larkin St., San Francisco, Cal.

THE PARIS APACHES.

Now, They Deal With Their Un-lucky Victims.

The foods in Paris afforded golden opportunities to the thieves and bandits—the dreaded "Apaches"—of the French capital. A Paris correspondent sends an interesting account of these reckless men and their methods and weapons.

"The desperate criminals who make a specialty of night attacks are a bloodthirsty, cowardly set of ruffians, and as they are always armed to the teeth and hold human life cheap, a solitary citizen going home late, or a policeman on a lonely beat has very little chance against them.

"When they have once made up their minds to rob a passerby—which one does not matter much—it is more than likely they will decide to begin operations at once. This means that three Apaches will take up a position on the pavement and pretend to be engaged in innocent gossip. The street is deserted. A solitary pedestrian comes into sight. In a moment he is surrounded by the three scoundrels on the lookout for the prey. There is not a policeman in sight. The moment is favorable.

"He has a gold chain," says one. "Hell do!" says the chief of an informal trio. "Get ready!"

They continue to converse until the stranger reaches them. Involuntarily he glances at them as he passes. That is sufficient.

"What do you mean by looking at us like that?" asks the chief in an insolent tone. Then, turning to his companion, he remarks, "Hasn't he got an ugly mug?"

"The pedestrian, however little he may be inclined to quarrel with the evil-looking ruffians who have accosted him, is unlikely to take their insults in silence. But at his first word of protest one of the group advances on him with a menacing air.

"What's his last name?" "I'll show you who's going to deal with him."

The stranger stands on his guard, but immediately another member of the trio bounds upon him from behind, seizes him around the neck with his arms and lifts him off the ground. His efforts to stifle in his throat, and if he succeeds in making a sound the arm which presses against his throat is tightened and he loses consciousness.

"While this is going on another of the accomplices goes through the victim's pockets, while the third keeps watch for the police. Then, when everything worth taking has been appropriated, the wretch who has almost strangled the victim releases his arm, gives him a violent push and sends him headlong to the pavement, where he will lie senseless for half an hour at least.

"But things do not always pass so easily. Sometimes the victim shows more resistance than was expected, and then the Apaches have to modify their plans. He must either be stunned with a blow from a button-hole or given a stab with a knife or dagger. The button-hole used by the Paris Apache is a terrible weapon. In appearance it resembles a small hatchet, without a handle, is about six inches long, and comes from the shoulder of the sheep. This and the knife and the knuckle-iron are the favorite weapons of the Paris hooligan. They are effective and noiseless, whereas the use of the revolver is likely to attract the police.

Among the more recent methods invented by the Paris Apache for rendering the passing citizen incapable of resistance is the lasso. At the favorable moment a cord from 15 to 20 feet in length and ending in a running knot is thrown by an expert hand. As it falls over the victim's head it is jerked tight, and, half strangled, he is thrown to the ground. The rest is easy."

USES FOR COTTON SEED.

Once Despised, To-day Many Products are Obtained from It.

There isn't one man in 10,000 who has the remotest idea of the vast number of uses to which the once despised cotton seed is now being put," said Capt. B. J. Holmes of New Orleans, recently.

From the clean seed are obtained linters and meats and hulls, the hulls making the best and most fattening feed for cattle that has yet been found. From the linters are gathered materials for mattresses, felt, wools, paper, rope and a grade of underwear and likewise collodes out of which gun cotton is made. The meats furnish oil and meal, the oil after refining being now in almost universal use in the kitchens of this and other countries. Before refinement to the edible stage, the oil is refined under many names, such as salad oil, starine, winter oil and white oil, oleomargarine being the product of starine. The white oil is the chief ingredient in compound lard.

"The original oil, known also as soap stock, has fatty acids used in the manufacture of soaps, roofing tar, paints and glycerine, and from this comes the explosive nitroglycerine. I might also add that the meat, aside from its use as cattle provender, is transformed into bread, cake, crackers and even candy. Last of all come the doctors, who are saying that this wonderful seed is a boon to the sick, since from its oils an emulsion is prepared that has been known to be of value in tuberculosis and other ailments."

AUTO GOSSIP

LOS ANGELES AND RETURN.

One of the most interesting and enjoyable trips of the past month was that of Leland W. Duke, vice-president of the Duke Advertising Agency of San Francisco and Los Angeles, who drove his five-passenger 1907 Locomobile touring car from San Francisco to Los Angeles and return. The party was composed of Mr. and Mrs. T. P. Sherman, C. H. Sherman Jr., and Mrs. L. W. Duke. In speaking of the trip, Duke said:

"I had been figuring on this trip for some weeks and everywhere I turned for information was told the roads were bad and I would never make the grades with a 20-horsepower machine and such a load. Such remarks from men who ought to know, naturally caused me some worry, but having confidence in the machine, I determined to make the most of it, so started May 15. Our route was via Oakland, through San Jose, over San Juan grade past Salinas, Jolon to Paso Robles over excellent roads. From there on through San Luis Obispo, Arroyo Grande, Santa Maria, Los Olivos, to Santa Barbara via Gaviota pass, roads are good. Castaic grade beyond Santa Barbara is one of the most picturesque parts of the trip. From the foot of the grade through Ventura, and beyond, are as good roads as I have ever gone over. Going into Los Angeles, I had the misfortune to go over the Newhall grade, which was in bad shape owing to the fact that it was plowed up and in the worst possible condition for quite a few miles. This was the worst piece of road on the whole route, but promises to be one of the finest after the repair work is completed. There are numerous side trips out of Los Angeles. The return trip was over the same route except by way of Santa Barbara we returned by way of San Marcos grade, which is very steep and rocky, but the magnificient view from the top is well worth the trip. Let me say to those who have never taken this trip, that it is one of the best in California, with fine roads and not difficult to make, if your machine is in good condition, and your brakes in the best of shape. The scenery is superb and nowhere else in the state can equal it. The drive is a real treat.
